Quiz 1

1) In a few sentences, tell me about your math background answering the following questions:

-What math courses have you taken, and where have you taken them?

-What do you enjoy/find challenging about math?

-What are your strengths/weaknesses in math?

-What does a typical week of studying for math look like for you? How often do you study and work problems?

-Is there anything else you'd like me to know?

2) When looking for application problems or project ideas, I try to appeal to the interests of my students. I also aim to be forward-thinking by considering career plans if they are known.

-Please tell me a bit about your interests/hobbies/clubs/sports/etc.

-What are your ideas about your future career? Do you have specific training programs or higher education schools that you are considering?
